

Easing the Pain

Keeping pace with operational demands, an extensive portfolio of projects and the ever-changing threat landscape can be daunting for any cybersecurity function. Evolving regulations, audit obligations, resource constraints, and managing training needs often leaves cybersecurity leadership and staff overwhelmed. At QurityTech, we design and execute solutions to relieve the pressure of governance, risk, and compliance (GRC) demands and strengthen organizations' security posture via a comprehensive and targeted suite of services.

Cyber Risk Management: QurityTech helps clients manage their risk environment by creating new and fortifying existing cybersecurity frameworks. We conduct risk assessments and implement framework foundational components, including controls, processes, documentation, and testing mechanisms.

Document Assessment & Development: Policies and procedures are the backbone of a robust cybersecurity program. Whether we create new or refine existing policies and procedures, we make sure documents clearly communicate cyber rules of engagement. Our analysts are expert scribes who create documentation that is actionable and audit ready.

IT Audit Advisory: Companies often expend extensive resources accommodating audits. We streamline the audit process helping clients prepare and respond seamlessly during audits. Our post-audit services include creating and executing remediation plans.

Security Awareness & Training: Our training experts specialize in creating, implementing, and enhancing security awareness & training programs empowering staff to recognize and combat cyber threats. We develop and deliver customized and standard training modules and conduct analysis and monitoring to gauge training program effectiveness.

Services & Solutions

QurityTech offers services designed to help optimize people, processes, and technology to meet GRC needs. Our primary services include Cyber Risk Management, Document (Policies & Procedures) Assessment and Development, IT Audit Advisory Services, and Security Awareness & Training.

The QurityTech Advantage

Our values of Quality, Excellence and Integrity and a special combination of competencies contribute to our success in serving clients.

Specialization. Governance, risk, and compliance (GRC) is our niche. We leverage our cybersecurity knowledge and business acumen to design and implement solutions.

Expertise. We have the expertise, experience, and dedication to de-mystify GRC and deliver transformative value to our clients. Our cyber professionals have the subject matter and functional expertise to deliver projects effectively.

Customization. While we leverage standard techniques for efficiency, every solution is customized to each client's unique circumstances.

Practical Business-Centered Solutions

QurityTech implements solutions in the context of our clients' business, focusing on strategic and operational goals. We use a risk-based approach and apply industry best practices. Highlights of our approach include the following principles.

GRC as a business enabler. Our methodology highlights GRC as a function that enhances business processes. Our work focuses on meeting regulatory requirements and security standards while simultaneously embedding GRC activities as business drivers that advance enterprises' strategy and operations.

Client empowerment. We partner with our clients to empower them with the tools and knowledge to maintain an effective GRC function. Our goal is to make each engagement an exceptional experience for our clients.

Efficient execution and collaborative design. QurityTech's analysts are expert collaborators who are uniquely skilled to enter an environment, build consensus, efficiently identify nuances and root issues, and implement solutions that meet our client's needs. We use tried and true techniques to complete engagements in a timely, cost-effective manner.
