- Awareness Resource Development

The QurityTech Advantage

Our values of Quality, Excellence, and Integrity and a special combination of competencies contribute to our success in serving clients.

Specialization. Governance, risk, and compliance (GRC) is our niche. We apply our cybersecurity knowledge and technical acumen to implement solutions.

Expertise. Our cyber professionals have the subject matter and functional expertise to deliver projects effectively.

Customization. While we leverage standard techniques for efficiency, we customize solutions for each client's unique circumstances.

Efficient execution and collaborative design. QurityTech's analysts use tried and true techniques resulting in pristine project execution.

Past Projects

Vitalant – CIS Security Framework Documentation

- Authored policy and procedure documents for CIS 18 safeguards, supporting framework transition and audit readiness.

Eduvantis – Risk Assessment

- Conducted a cyber risk assessment based on NIST CSF, evaluating the organization’s information and technology controls. Deliverables included enterprise security policy, assessment report, gap analysis, roadmap, and Plan of Action & Milestones (POA&M).

Kestra Financial – SOC 2 Readiness

- Provided project management services for SOC 2 audit.
- Provided technical writing services, developing policies and procedures for the information security program.
- Administered workflows and documentation for GRC tool.

Options Clearing Corporation – Project Management/Compliance Framework Enhancement

- Provided Scrum Master project management services for identity and access management (IAM).
- Developed security requirements for enterprise system implementation (AWS-based) and process re-engineering initiative.

Begin Within Coaching and Consulting Services – Information Security HIPAA Assessment

- Conducted a cyber risk assessment of security processes, analyzing alignment with Health Insurance Portability and Accountability Act (HIPAA) standards. Deliverables included enterprise security policy, assessment report, gap analysis, roadmap, and Plan of Action & Milestones (POA&M).

Palette / Zebra Technologies – Product Security Assessments

- Conducted security assessments of Internet of Things (IoT), cloud-based (Google Cloud Platform) products, leveraging best practices and standards, including NIST 800-53, CIS CSC Benchmarks, and OWASP.
- Implemented framework for security assessment fieldwork and reporting in enterprise GRC tool.
- Developed a program to determine risk management maturity of Internet of Things (IoT) product teams.

Cleveland Realist Association - Cybersecurity Training

- Created and delivered cybersecurity training highlighting protection mechanisms for small businesses.

Practical Purpose-Centered Solutions

QurityTech delivers solutions grounded in the operational realities of public-sector and private organizations. Our approach focuses on our clients’ strategic and operational goals.

GRC as a mission enabler. Our work meets regulatory requirements and security standards while simultaneously embedding GRC activities as drivers that advance organizations’ mission and objectives.

Client empowerment. We partner with our clients to empower them with the tools and knowledge needed to maintain an effective GRC function.

Efficient execution and collaborative design. QurityTech’s analysts are consummate collaborators uniquely skilled to identify root issues and implement effective solutions. We use techniques to complete engagements in a timely, cost-effective manner.
